DETAILED ACTION

This Office Action is responsive to communications filed on January 27, 2001.

Drawings

The drawings are objected to because Figures 6, and 7a-7g lack suitable descriptive legends necessary for understanding of the illustrations.

In addition, Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-23 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims are considered allowable when reading the claims none of the references of record singly or in combination disclose or suggest the combination limitations specified in the independent claims including a method and apparatus for generating a set of asymmetrically restrictive costs, rather than just symmetrical costs, associated with directional paths between nodes in a group of nodes of a network system wherein each node in the group is connected by a unidirectional link to at least one other node in the group, and each link associated with a pair of directional costs such that each link can be considered as a pair of oppositely-directed, unidirectional links each of which extends from a source node to a destination node and has an associated directional costs; e.g., generating a transition matrix for a PNNI peer group.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
